

Construction Site Safety Plan

Construction sites need to have a safety plan to ensure that all the workers know how to use the equipment safely and protect themselves. These safety measures will be followed by all teams during the Showcase.

Construction Site Safety Equipment

<p>Eye Protection</p> 	<p>Head Protection</p> 	<p>Closed-toe shoes</p> 	<p>Hair tucked / tied back</p> 
---	--	--	--

Judges have full authority to STOP teams due to safety concerns.

Fill in the information below to plan how your team will operate your device safely.

Team Number: _____

Team Name: _____

Team Logo (optional):

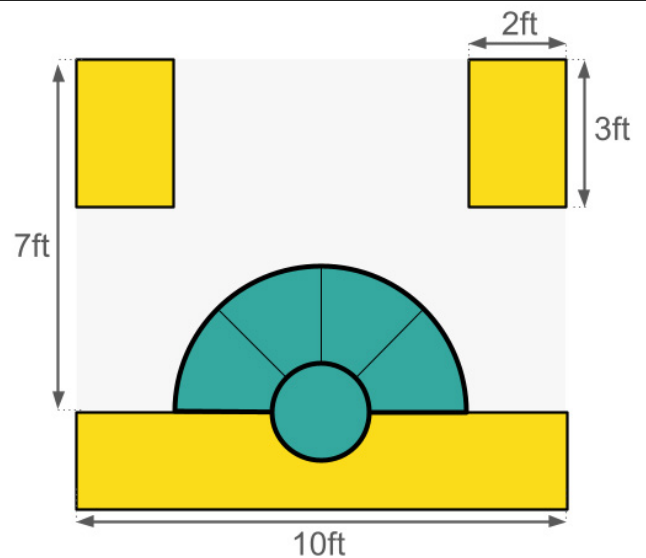

Safety Area Diagram (Top View)

Teams must stand in the safety areas while the device is being operated

Draw on the Diagram:

- ★ Star the locations where your team will be standing when operating your device.
- If your device is long:
 - Circle or shade all the places your device reaches outside the construction site.

To ensure safety, make sure the areas where your team is standing, and the device is operating do not overlap.

■ Green area is the construction site
 ■ Yellow areas are safety areas

Our device has the following safety features:

- No flammable liquids or gasses
- No animals
- No sharp edges
- No liquids leaking

What other ways have you made sure that your device is safe to operate?

What will your team do to keep everyone safe?
