

The Tech for Global Good

Inspire the Changemakers of Tomorrow:
Support The Tech for Global Good

"Every once in a while, a new technology, an old problem, and a big idea turn into an innovation that changes the world."

— Dean Kamen (Inventor & Global Humanitarian Award Recipient)

The Tech for Global Good is a signature program of The Tech Interactive, which celebrates the power of technology to make the world a better place and inspires the next generation to do the same. Through compelling storytelling, hands-on exhibits, and classroom resources, the program reaches thousands of students with real-world examples of how innovation can solve pressing global challenges.

A partnership with The Tech for Global Good connects your brand with hundreds of thousands of visitors while driving real equity in STEAM. Together, we can help the next generation step into roles as tomorrow's leaders.

Program Overview & Community Impact

The Tech Interactive is dedicated to helping people explore new ideas, ask better questions, and build the confidence, curiosity, and critical thinking skills needed to tackle tough real-world problems. Each year, we honor 4 laureates and create 3-4 short films bringing their stories to life in our exhibit, hands-on curriculum, and online content. Through these films and engaging storytelling, The Tech for Global Good reaches students locally, nationally, and globally.

Your sponsorship fuels every layer of The Tech for Global Good ecosystem:

- **The Tech For Global Good Exhibition:** Over 300,000 annual visitors engage with The Tech for Global Good exhibition at The Tech Interactive. Evocative videos and interactive displays tell the stories of global laureates, focusing on real-world problems, solutions, and measurable impact.
- **Teacher Training & Curriculum:** The Tech Interactive provides high-quality professional development and classroom lesson plans to educators, translating laureate innovations into practical, inspiring learning.
- **Access & Outreach:** Program proceeds directly subsidize school field trips, support our Museums for All accessibility program, and expand STEM education outreach to underserved communities.
- **Interactive Student Labs:** Field trips at The Tech Interactive feature lab experiences integrated with The Tech for Global Good principles.

2027 Tech for Global Good: Robots for Humanity

The upcoming theme, Robots for Humanity, celebrates extraordinary breakthroughs where robotics and human-centered design intersect to restore independence, enhance health, and improve quality of life.

The 2027 Tech for Global Good Laureates

Every day at The Tech Interactive, students watch the stories of The Tech for Global Good laureates and imagine themselves as innovators. One young visitor summed it up perfectly after watching: *"Do you think I could do that?"* That spark of possibility is exactly what the program delivers: diverse, global role models whose journeys show students that problem solvers come from every background, and that they, too, can use technology to change the world.

We are thrilled to announce our 2027 laureates, who are sponsored each year by individuals, foundations, or companies that value the role technology can play in addressing key challenges we face in our world.

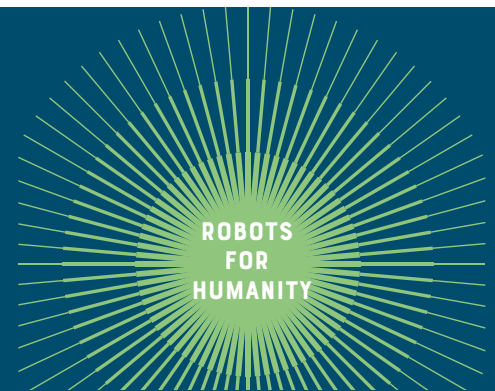

- **Diligent Robotics:** Autonomous hospital robots supporting nurses and healthcare staff
- **Glidance:** Autonomous mobility guidance for the visually impaired
- **PillBot by Endiatx:** Micro-robotic swallowed capsules offering non-invasive internal health monitoring
- **Wandercraft:** Robotic exoskeletons designed to help individuals with mobility impairments walk again

The James C. Morgan Global Humanitarian *presented by Applied Materials Inc.*

In addition to our laureates, we present the James C. Morgan Global Humanitarian Award to a visionary leader whose broad vision and leadership are focused on combating critical challenges on a global scale. Named in honor of Applied Materials Chairman Emeritus James C. Morgan, past honorees include Steve Wozniak, Reid Hoffman, Bill Gates, Al Gore, will.i.am, Dr. Fei-Fei Li, and Queen Rania Al Abdullah.

The Global Humanitarian is also featured in the exhibit through a 4-minute film. [Click here](#) to view past honorees and learn more about the award.

The 2027 Global Humanitarian is to be announced!

**2027 TECH FOR
GLOBAL GOOD**
Celebration

Saturday, January 30, 2027
Signia by Hilton San Jose

This program culminates at the annual Tech for Global Good Celebration, where we further honor our laureates and the Global Humanitarian, amplifying their work and shining a spotlight on how technology can change the world. It's more than a celebration; it's the launchpad that fuels new educational content, inspires students globally, and rallies our community of leaders, donors, and changemakers around the belief that the problem solvers of today can ignite the innovators of tomorrow.
